BMA ESG CONCLAVE

18th December 2020
4.00 pm to 7.00 pm
In Digital Format

It is the convergence of sustainability, technology and spirituality that will solve the planet's problems. We need to change our mindsets about responsible consumption and responsible living to make a difference. An innate and ever enhancing attitude of KINDNESS is essential to feel that we must heal together!

The conclave shall have sessions on key issues facing our planet such as global warming, emissions, discharge of non-bio-degradable material into our lakes, rivers, and oceans, methane emissions from landfills, removal of forests for grazing land, rapid urbanization, unsanitary habitats, dust pollution, swarming insects in search of food, desertification, water scarcity and water table degradation. We shall also focus on moonshots that will eliminate all these scourges. and discuss frameworks and platforms that will solve these problems on a global scale and help monitor the solutions and their impact continually.

Shri. Shailesh Haribhakti
Chairman, Shailesh Haribhakti Associates.
